### Summary

I possess strong capabilities in full-stack development, focusing on building secure applications, optimizing server infrastructures, and implementing efficient workflows. My experience includes enhancing performance and ensuring seamless integration in various projects.

### Skills / Achievements

- **PHP Development** - Proficient in modern PHP practices and version standards.
- **Object Oriented Programming (OOP)** - Strong understanding of OOP principles applied in software design and application development.
- **Laravel Framework** - Expertise in building secure and maintainable applications.
- **WordPress Development** - Strong background in creating and optimizing WordPress sites and plugins.
- **MySQL Database Management** - Skilled in database design, optimization, and querying.
- **API Development** - Experience in building and integrating RESTful APIs for seamless communication.
- **Version Control Systems (Git)** - Effective use of Git for collaboration and version management.
- **Continuous Integration/Deployment (CI/CD)** - Familiarity with CI/CD processes to streamline development workflows. Including Azure DevOps.
- **Server Management** - Experience in managing server environments, including Azure Web Services.
- **HTML5 and CSS3** - Developed responsive web pages.
- **Bootstrap** - Implemented Bootstrap frameworks to expedite the development process.
- **JavaScript** - Enhanced user interaction and engagement.
- **MVC** - Applied MVC architecture in projects.
- **Analysis** - Conducted thorough project requirements analysis.
- **Troubleshooting** - Developed strong troubleshooting skills to quickly resolve issues.

---

## Experience

### **Turquoise Choice, California, USA** - *Full Stack Developer*

March 2023 - August 2024

- Developed a compatibility layer between Laravel and a legacy WordPress system, enabling seamless migration for 100+ clients.
- Managed the migration from WordPress to Laravel, decreasing page load times by 40% and enhancing user experience.
- Enhanced the user interface with HTML5, CSS3, and Bootstrap, resulting in a responsive design that improved usability across devices.
- Established CI/CD workflows using Azure Web Services, decreasing deployment times by 35% and increasing overall team productivity.
- Improved server structure and efficiency, maintaining 99% uptime.

### **FTRZ Agency, Ankara, Turkey** - *Full Stack Developer*

January 2023 - March 2023

- Developed custom WordPress plugins and themes.
- Achieved Google PageSpeed scores above 80 on mobile, enhancing user experience.
- Created API-based solutions, improving system interoperability.
- Integrated Chat-GPT for content generation, reducing manual content creation time.
- Implemented caching mechanisms, decreasing loading times by 25%.
- Conducted performance audits, identifying and resolving bottlenecks effectively.
- Developed a CodeIgniter CRM plugin for internal use, streamlining operations.

### **Ozkula Internet Hizmetleri, Istanbul, Turkey** - *Full Stack Developer*

August 2015 - August 2022

- Managed web development and server support, maintaining 99% system uptime.
- Created a bridge for electronic invoicing, enhancing data exchange and reducing processing time by 40%.
- Improved website performance and optimization.
- Collaborated with teams for timely project delivery.
- Conducted client training sessions on new systems.

### **Atlantis Dekoratif ve Sanatsal Ürünler, Istanbul, Turkey** - *Full Stack Developer*

August 2009 - August 2015

- Developed E-Commerce software solutions.
- Created order management systems, reducing processing time by 25%.
- Optimized performance for large product catalogs, improving site speed by 40%.
- Streamlined product listing processes, enhancing user experience.
- Collaborated with design teams for UI improvements.

---

## EDUCATION

**Yildiz Technical University, Istanbul Turkey**

AY 2007 - AY 2009

Computer Technology and Programming

## LATEST PROJECTS

**Pickleball360.me** - *Full Stack Developer @ Turquoise Choice - 2024*

Pickleball ecosystem for players, club managers, event managers and venue managers. The system supports event, venue, and club management within a tightly structured platform. Project included an Azure devops pipeline for deployment operations
